# **User Manual** AUDI Carplay MMI BOX

Apple CarPlay

Android AUTO

### **Specifications**

Input	USB/CVBS signal input	
Input Voltage	12-16V DC	
Rated Current	2A	
Rated Power	24W	
Control	Voice /iDrive control	
Material	Housing aluminum	

### **Panel description**

CAN Power	For power cable connection, CAN data transmission	
Antenna	Wifi antenna connector	
USB Camera	USB data transmission, and for reverse/front camera conenction	
LVDS OUT	Connect with cable labeled 'LVDS-OUT-CIC'	
LVDS IN	Connect with cable labeled 'LVDS-CIC-C19'	
Toggle switch	<b>/itch</b> Refer DIP code setting to set for different car models	
360 IN	Exterior 360 input (VGA signal input)	

#### **Features**

- >Support wireless/wired Carplay function
- >Support wireless/wired Android auto function
- >Support wireless Airplay function
- >Support wired Autolink function
- >Compatible with OEM and external microphone
- >Support EQ adjustment, lossless sound quality
- >Support HDMI input
- >Support USB to play audio and video, support firmware upgrade
- >Keep the OEM system function, reversing radar and track display

### **Accessories**

### Main harness for different car models

Main Harness CAN-GPXI1701-A6 Main Harness CAN-GPXI1701-A7C Main Harness CAN-GPXI1701-A8 Main Harness CAN-GPXI1701-Q3S Main Harness CAN-GPXI1701-Q5U

- 1. Q5 high config, Q7, A6, A8: NAV button
- 2. Q5 low config: NAV/CAR/MEDIA/INFO button
- 3. A3 B9 Q3: MEDIA button

### FAQ

- 1.Q: What need to be paid attention to during installation?
  - A: 1) Make sure that the carplay box is compatible with the installed model, and check whether the label of box matches with the car model
    - 2) Power off during installation
    - 3) After the installation is complete, it is best to lock the car for a few minutes to turn it on, wait until the running test is normal, then restore the car
- 2.Q: While switching to carplay, the screen displays no signal, abnormal screen or no response?
- A: 1) Check whether the wiring is connected according to the wiring diagram
  - 2) Check if the pins of the lvds cable ports are bent or not in contact, please re-plug it
  - 3) Check whether the dip switch code is correct, Power off when changing the dip code
  - 4) If the dip switch code and wiring connection are normal after confirming, box still switches to the black screen, contact aftersales service to solve
- 3.Q: I don't have sound when I connect carplay, what can I do?
  - A: 1) if your car has AUX function, set on OEM system
    - 2) if no AUX on the car, please connect AMI-to-AUX cable to get sound

- 4.Q: When I call someone, he can hear himself, how to do?
- A: Solution1
- 1) There are 4 default options available(Fig.1)
- 2) Try one by one, after changing the setting, restart to take effect

	Return	Audio		
	Volume		17 —	•
	EQ			>
	Loudness		on	off
	Active Aux			>
0	Mic Echo PreConfig			< Default >

- A: Solution2
- 1) Adjust the volume of the original car to normal use
- 2) Turn the volume in 'audio' setting to 13(Fig.2)

- 3) Turn the 'Microphone Volume' to 12
- 4) 'Microphone OP' tune from 0 until no echo is heard
- 5) Adjust 'AEC quality' to 2
- 6) If the caller hears the echo interval for a long time, fine-tune the 'Microphone delay
- 7) If the caller hears a small voice, you can fine-tune the 'Microphone Volume' and 'Microphone PGA'

- 5.Q: Solutions to not being able to connect with carplay?
  - A: 1) Click on carplay bluetooth or wifi on the mobile phone
    - 2) At the same time, clear the Bluetooth devices on the mobile phone and the car, and then pair and connect
    - 3) Go to WirelessDev to reset the Bluetooth, and then pair and (Fig.1)
    - 4) Restore the mobile network to the mobile phone
    - 5) Check whether the carplay on the mobile phone is turned on (Fig.2)
    - 6) Siri permissions are all turned on(Fig.3)

7) If necessary, check the antenna (whether it is broken, or attached to the metal, stay away from the box)
